

MID-HUDSON RADIO CONTROL SOCIETY  
General Meeting Minutes

Date: 5/2/2011

Start time: 7:10 PM, at the Poughkeepsie United Methodist Church

Present: 21 members and guests

- Warren went over the club calendar in regards to upcoming events. This included the club “float fly” to be held at Lake Taghkanic. For the float fly, remember to be courteous to other boats, bring your own food, bring planes and boats, and have fun.
- Starting with the month of June, the club meetings will be field meetings on the first Fridays of the month for the summer, alternating between the Wallkill and Redwing fields.
- Warren noted that the Redwing field work party was attended by 13 club members. High brush was cleared and trimmed on the south side of the field. Tic control was applied, benches were fixed, and the field was rolled twice. Grass seed was spread a few days earlier.
- The Wallkill field work party was 2 weeks prior, and the field is in good shape.
- Warren mentioned that the sanctions are in for this year’s Jamboree.
- Ron Revelle brought in his Venus 2 pattern plane for showing.
- Jim Wood brought in his Scientific “Enson”, 1940 vintage model that was rebuilt in 1980. He has converted it to “R/C”.
- Jonathan Elie brought in his own designed “blue foamie” airplane, shaped as a large round disk, complete with LED lights attached to the perimeter of the model.
- Reminder that there will be a club fun-fly in June complete with fun events and prizes.

Meeting adjourned: 8:10 PM
